Fill in the blanks below with words from this box:

Neptune	gas giants	Pluto	planetoids
solar	Mars	nine	comets
asteroids	Jupiter	temperature	terrestrial
orbit	water	Saturn	Uranus
dinosaurs	Earth	Venus	tail
Mercury			

The Solar System			
The	system is the group	of planets thatou	r
Sun. There are	knowr	n planets in our solar system, but some	2
		eyond the orbit of	
The Terrestrial Pla	nets		
Mercury, Venus, Ear	th, and Mars are called _	planets becaus	e
they have rocky sur	faces	, of course, is the planet we live on.	
		the sun, which	
also called the even	ing star, has a	of 500 degrees Celsius and	
clouds of sulfuric ac	cid.	is known as the red planet. Recent	ly,
frozen	was discovered th	ere.	, .
they are big and ma	de mostly of gas	lled because is the largest planet in t	the
solul system.		is famous for its rings. also has rings but is not as famous as	
		is named after the god of the sea.	
MVQ3 MI	Saturn.	_ is harried after the god of the sea.	
	Planetoids: Asteroids and Comets		
100		in the solar system	
	Between Mars and Jupiter there is a belt of small rocky objects		
	•	As well, balls of ice and rock calle	
	occasionally come close to the sun creating a		
	bright that can be seen from Earth. Some		
***		became extinct when a	
		rashing into the Earth.
