

Flu Season

It's flu season. Many people are sick. Many children are absent from school. Many adults are absent from work. How do sick people get better?

Sick people need rest. Children stay home from school. Adults stay home from work. They keep warm under their covers.

Sick people take medicine. They see a doctor. The doctor checks their bodies. The doctor gives them medicine.

Sick people need healthy food. They eat soup and drink fluids. Soon they start to feel better. Soon they are well again.
