Kids at school are excited. They are looking out the window. Snowflakes are starting to fall. It's snowing outside. What happens when it snows?

When it snows, kids make snowmen. They roll snow into big balls. They place the balls of snow on top of each other. They use sticks to make arms. They use carrots to make noses.

When it snows, kids go sledding. They pull the sled up the hill. They sit on the sled. They ride the sled down the hill. Then they do it again.

When it snows, kids make snow angels. They lie in the snow. They flap their arms. They stand up. They see an angel in the snow.
